SUMMARY

Gen AI Business Analyst focused on turning data into insights using Power BI and Excel. Interested in requirements gathering, reporting, and enabling teams to make smarter, efficient, and impactful business decisions.

SKILLS

- **BA + Generative AI:** Automating reports, summarizing data, drafting insights, and enhancing stakeholder communication using AI tools.
- **Power BI:** Creating interactive dashboards for clear insights
- **MS Excel:** Sort/Filter, Pivot Tables, IF, VLOOKUP, Charts
- **Soft Skills:** Teamwork, problem-solver, and a good listener

PROJECTS

- **Project: Blinkit Grocery Data Analysis – Power BI**
Analyzed 50,000+ grocery sales records to identify sales trends and customer preferences. Discovered large outlets drive higher revenue, high-fat content items sell better, and the top 3 categories contribute 35% of total sales. Built an interactive Power BI dashboard for strategic insights.
- **V-spark Company**
Joined as a Graphic Design Intern but primarily focused on client communication, requirements gathering, and using insights to inform design creatives. Actively followed up with clients during design execution, provided suggestions, and ensured outputs met business needs. Left after 2 months to focus more on Business Analysis and working directly on requirements and data.
- **Pizza Sales Insights Using SQL & Power-BI**
Analyzed 23K+ pizza chain transactions using SQL, ETL, and Power BI, uncovering key revenue drivers (large pizzas +22%, weekend sales +30%, Thai Chicken Pizza top-seller) to optimize pricing and inventory.

EDUCATION

Sharda University , Greater Noida, UP Bachelor of Computer Application	2022 - 2025
Navin Bharti Sr. Sec. School , Shahdara, Delhi Intermediate	2019 - 2021
